

# KAADHKA MACLUUMAADKA (EPIDURAL) CIRBADEYNTA LAF-DHABARKA

## Epidural'ka markii la foolanaayo – maxaa uu baahan tahay inaad ogaato

(Kaadhkaan waa mid kooban. Maclumaad dheeraad ah waxaa laga heli karaa [www.oaaformothers.info](http://www.oaaformothers.info). Fadlan kala hadal takhtarkaaga suuxinta wax kasto oo aan caddeyn)

### Diyaarinta cirbadeynta laf-dhabarka (epidural)

- Waxaad u baahan doontaa in tubo yar lagaa geliyo xididka gacanta iyo waxaa surto gal ah in biiyaha faleebada lagugu suo xididka.
- Inta laga gelinaayo tubada yar ee laf dhabarkaaga (epidural), waa muhiim inaadan dhaqaaqin iyo u sheeg takhtarka suuxinta haddii uu xanuunka foosha kugu bilaabdey.
- Waxay caadi ahaan ku qaadata 20 daqiiqo diyaarinta iyo 20 daqiiqo ka hor intii ay si buuxda u shaqeynин.
- Qaar ka mid ah epidural'ka si buuxda uma shaqeeyaan waxayna u baahdaan in la beddolo ama la hagaajiyo.

### Faa'iidoyinka epidural'ka

- Wuxuu caadi ahaan yahay xanuun joojiye aad u fiican.
- Mar-mar waxaa laf-dhabarka (spinal) lagu cirbadeyn karaa daawada xanuun joojiyaha ah sidii waxtar deg-deg ah loo helo.
- Qiyaasta iyo nooca xanuun joojiyaha mar-mar waa la beddelli karaa sidii laguu siiyo awood inaad sarriirta ku dhaqaaqdo. Kani waxaa loo yaqaana epidural'ka qiyaasta yar leh (ama lagu dhaqaaqi karo).
- Cadi ahaan epidural'ka wax-yeelo uma geysanaayo cunuggaaga.
- Waa la xoojin karaa awoodiisa markii la sameynaayo qalliinka dhalidda haddii loo baahdo.

### Dhibaatooyinka ka imaan karo epidural'kaaga

- Badinta qiyaasta xanuun joojiyaha oo xoog leh wuxuu keeni karaa in si ku meel gaar ah lugahaaga awood-darro yeeshaan kaasoo badin doonto halista in cunugga lagu soo saaro qalab.
- Epidural'ka wuxuu in yar tartiibin karaa marxaladda labaad ee dhalidda.
- Waxaa kugu dhici karo dhiig yar, cun-cun ama xummad markii aad isticmaalayo epidural'ka.
- Goobta laga sameeyay epidural'ka wuu ku xanuuni karaa laakin maalmo yar oo keliya. Dhabar xanuunka KAMA imado epidural'ka laakin waa iska caadi uur ka dib.

### Dhinaca kale ee kaadhkaan waxaa ku qoran khatarta muhiimka ah ee epidural'ka

# KAADHKA MACLUUMAADKA (EPIDURAL)

## CIRBADEYNTA LAF-DHABARKA

Khatarta ka imaan karto epidural'ka ama cirbadeynta laf-dhabarka sidii loo yareeyo xanuunka foosha

Nooca khatarta	Imisa jeer ayuu dhaca?	Sidee ayuu caadi u yahay?
Dhiigga oo si badan hoos uu dhaco	Halkiiba 50 dumar walba	Mar-mar
Si fiican u shaqeeyin sidii loo yareeyo xanuunka foosha taaso keenayso inaad isticmaasho habab kale ee aad ku yarayso xanuunka  Si fiican waxtar ugu leheen qalidda ilmo dhalidda (caesarean), sidaas awgeed waxaad u baahan doontaa in lagu suuxiyo	Halkiiba 8 dumar walba  Halkiiba 20 dumar walba	Caadi  Mar-mar
Madax-xanuun oo xun  Dhaawac gaaro dareen-wadeyaasha (meel aan wax laga dareemin lugta, ama lugta oo awoodeeda yaraado)  Wax-yeelidda la dareemo in ka badan 6 bilood	Halkiiba 100 dumar walba (epidural)  Halkiiba 500 dumar walba (spinal)	Caadi ama ahan  Naadir (dhif ah)
Jeermis ka dhasho aaga lagu sameeyay epidural'ka  Meningitis (cudur maskaxda ku dhaco)  Epidural haematoma (xinjir dhiig)	Ku meel gaar - Halkiiba 1000 dumar walba  Joogto ah - Halkiiba 13,000 dumar walba	Naadir  Aad naadir u ah
Shil ahaan loo suuxo  Dhaawac aad u xun, oo ay ku jирто in baaralays (curyaaanimo) la noqdo	Halkiiba 50,000 dumar walba  Halkiiba 100,000 dumar walba  Halkiiba 170,000 dumar walba	Aad naadir u ah  Aad naadir u ah  Aad naadir u ah
	Halkiiba 100,000 dumar walba	Aad naadir u ah
	Halkiiba 250,000 dumar walba	Aad iyo aad naadir u ah

Macluumaadka laga helo dokumentiyada la soo daabacey ma bixiyo tirada saxda ah ee khataradaan. Tirada kor ku xusan waa qiyaasid wayna u kala duwanaan karaan isbitaalada kaladuwani.

**Dhinaca kale ee kaadhkaan waxaa ku qoran macluumaad ku saabsan epidural'ka loo isticmaalo xanuunka foosha**
